SECURITY INFORMATION

SECRET/CONTROL/US OFFICIALS DILY SECURITY INFORMATION comments. 50X1-HUM According to concordant information, the Templin troop training grounds was almost completely occupied in late April 1952, as in 1951, the units are believed stationed in the camp as follows: the 6th Gds lecz Div in Camp Hammelspring and Kannenburg, the 25th Tank Div in Gamp Vogelsang, units of the 11th 3ds AT Arty Prig (?) and individual headquarters units of the Fourth dds Necz Army presumably chiefly in Camp Mammelspring. There is no indication that the troop training grounds are more heavily occupied than in 1951. Ho major practices are expected at present, as the troops are 50X1-HUM occupied with reconditioning their quarters and the installations. (4) There is a possibility that army troops of the Fourth 3ds Necz 'rmy in Eberswalde are also stationed in Camp Vogelsang. The strength estimate of 12,000 troops appears to be about 25 percent too high. It is possible that elements when moving to the troop training grounds by road, may have used their transfer for practices and thus may have arrived somewhat later. The 166 T-34 tanks observed probably belong to the three medium tank regiments of the 25th Tank Div, however. It is conceivable that a firing range, previously unknown, may be located between Purguall and Gamp Vogel-

sang. A Lieutenant Colonel Zemyonov (fnu), probably supply officer of a unit of the 25th Tank Div in the Oranienburg concentration camp, is known.

which is east of Camp Vogelsang rather than north of it.
